Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 15, 2003 has been entered.

Response to Arguments

2. Applicant's arguments with respect to elected claims of record have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-8, 14, 19-20, 23-24, and 26-28 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by WO 93/07260.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 11, 15, 17-18, 21, and 32 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 93/07260 in view of Barach et al.

WO 93/07260 discloses a spray-dried fermentation broth and process therefor which meets all the limitations recited in the claims cited in the rejection above. Claim 11 which recites the step of de-sludging the fermentation broth and claim 15 recites a physical treatment selected from the group consisting of heating, cooling, radiating, mixing, aerating and ultrasound treatment. Claims 17-18 and 32 recite the sterilization of the broth. Finally, claims 21-22 recited the specific type of atomizing devices.

Barach et al. teaches that it is conventional to submit fermentation broths to procedures such as claimed including desludging. It would have been obvious to one of ordinary skill in the art at the time the invention was made to treat the fermentation broth of the claims in a conventional manner for the purpose of improving the recovery of the microbial cell mass. Absent objective evidence to the contrary, sterilization is deemed well within the skill of the practitioner, particularly if the broth will ultimately be used for a food or medical product. Finally, absent objective evidence to the contrary, since the WO reference teaches that an atomizer is used in the production of the disclosed

product, the claimed atomizers are deemed conventional and a choice well within the skill of the practitioner.
